

# RENAL PHYSIOLOGY FOR THE CLINICIAN

## Fluids, electrolytes and acid-base

*All you need to know about fluid and electrolyte balance, but were too puzzled to ask!*

**2-4 March 2005**

**The Royal Free Hampstead NHS Trust, Pond Street, London NW3 2QG**

---

Renal physiology has long been a neglected part of the UK postgraduate curriculum. This course aims to integrate physiological principles with day-to-day clinical practice. The course will consist of formal, introductory lectures each morning, followed in the afternoon by clinical case-based and interactive discussions between the delegates and our faculty designed to illustrate and build upon the morning presentations. This course is intended for Specialist Registrars in Nephrology, but will also be of interest to more senior General (Internal) Medicine Specialist Registrars and SPRs in Intensive Care Medicine. Consultant Nephrologists and General Physicians with an interest in fluid and electrolyte disorders are also welcome to attend as a 'refresher' course.

- ◆ **Morning lectures by expert guest faculty** ◆  
◆ **Afternoon case studies and interactive discussions with the experts** ◆

---

### COURSE FEES

#### SPR/SHO/STAFF GRADE

**£385** EARLY registration to 27 December  
**£415** LATE registration after 28 December  
**£145** day registration fee
