

DIALYSIS 2012

A comprehensive course on dialysis and the management of patients with end stage renal failure

2-4 May 2012

Sir William Wells Atrium

The Royal Free Hospital, London NW3

The management of end stage renal failure by dialysis forms a central component of all renal units. However, it is often the least intensively taught component of nephrology training. The aim of this course is to provide a thorough introduction to dialysis, from basics to new developments. The invited expert faculty will provide comprehensive coverage of all aspects of dialysis and ESRF through a mixture of informal lectures and workshops. The course is aimed at Specialist Registrars in nephrology, but will also be of interest to other health care professionals involved in the management of patients with chronic renal failure.

CPD credit to be confirmed by the Royal College of Physicians of London

Registration opens 5 December 2011

Registration closing date 2 April 2012
